DAISSy-HOU announces the launch of the DigiCitizenEdu Newsletter

The DAISSy Research Group of the Hellenic Open University (HOU), the Greek partner of the Digital Citizenship Education (DigiCitizenEdu) European project, is proud to announce the launch of its newsletter. The first DigiCitizenEdu newsletter has been published, highlighting the progress on two of the project's key deliverables, developed under Work Package 2 (WP2), led by the Research Group, namely a compendium of good practices, and a comprehensive digital citizenship training course.

Newsletter - October 2026

Dear Reader,

We are happy to share with you the latest updates from our journey to empower Digital Citizenship Education!

Where We Are Now

We are living in an increasingly digital world. But digital skills alone are not enough. People need to understand their rights, their responsibilities, and how to participate actively in a democratic digital society.

Right now, we are focused on developing the most important output of the project: our **training course on Digital Citizenship**, designed for all citizens. The course will comprise four modules and aims to enhance digital citizenship knowledge and skills. No prior knowledge is required. All citizens will be able to enrol in the course, which will be available on the All Digital Academy platform.

We are also preparing additional "Further Reading" materials for educators and anyone who wants to deepen their understanding of the course content. This first version of the training course will give us the opportunity to gather essential feedback from educators and learners, which will be crucial in creating the final version.

By the end of this year, we will also publish the **Digital Citizenship Compendium**, a collection of best practices in digital citizenship. It will showcase real examples of how digital citizenship is being advanced in different contexts and communities.

More precisely, the Digital Citizenship Compendium, set to be published by the end of 2026, brings together a curated collection of good practices, case studies and methodologies on digital citizenship. The compendium serves as a valuable resource for educators, policymakers, and training institutions, supporting them in developing the skills needed for active, informed, and responsible digital engagement.

Furthermore, the digital citizenship training course aims at enhancing participants' digital knowledge and skills. No prior experience will be required, and enrolment will be open to everyone through the All Digital Academy. Supplementary "*Further Reading*" materials are also being prepared alongside the course, targeting educators and citizens, wishing to explore the topics in depth.

The DAISSy Research Group of the Hellenic Open University (HOU), leads the "Training Development and Delivery" (WP2), drawing on its extensive expertise and long-standing experience. Its responsibilities include the design and development of the training pathway, the development of the training platform, and the coordination of the two pilot training cycles. In addition, DAISSy-HOU is responsible for the project's Quality Assurance, ensuring the consistent monitoring, evaluation, and high-quality implementation of all project activities and outputs.

➲DigiCitizenEdu is an Erasmus+ project co-financed by the European Education and Culture Executive Agency, running from 01.01.2026 to 30.06.2028. It responds to broader European priorities for strengthening Digital Citizenship Education. The DigiCitizenEdu consortium includes five (5) organizations from four (4) countries, namely: "ALL DIGITAL" (Coordinator, Belgium), "Fundacion Esplai Ciudadania Comprometida (ESPLAI)" (Spain), "Solidar Foundation for Humanitarian, Development and European Cooperation (SOLIDAR)" (Belgium), "Association for Social Innovations Association for Development of New Options Skopje (ARNO)" (North Macedonia), and "Hellenic Open University-DAISSy Research Group (HOU)" (Greece).
