Educational Technology in English Language Teaching

VOLUME 2

USING THE INTERNET AND COMPUTER TECHNOLOGY IN EFL CLASSES

PATRAS 2005
General aims of the chapter ........................................................................................................15
Expected outcomes/objectives ....................................................................................................15
Key concepts ................................................................................................................................15
Introductory remarks ................................................................................................................16

Section 6.1

The Internet ..................................................................................................................................17
6.1.1 Introduction – the technical stuff .....................................................................................17
6.1.2 Some historical notes ......................................................................................................18
6.1.3 The internet for teachers .................................................................................................19
6.1.4 The internet for students .................................................................................................20

Section 6.2

Internet Services ..........................................................................................................................22
6.2.1 The World Wide Web (WWW) – an introduction .........................................................23
6.2.2 Browsers .........................................................................................................................24
6.2.3 HTTPs and URLs ............................................................................................................25
6.2.4 Search engines ................................................................................................................27
6.2.5 Techniques for better results: .......................................................................................28
6.2.6 Some of the best Search Engines ..................................................................................29
6.2.7 Meta-search engines .......................................................................................................29

Section 6.3

The web for teachers ..................................................................................................................32
CHAPTER 7

COMPUTERS AND WRITING: THE ROLE OF THE WORD PROCESSOR, EMAIL AND THE WWW

Diane Slaouti

General aims of the chapter ...............................................................................................77
Expected outcomes/objectives ...........................................................................................77
Introduction ........................................................................................................................80

Section 7.1

Process writing ..................................................................................................................81

Section 7.2

Word processors and process writing .............................................................................86
7.2.1 Learner attitudes and motivation ...........................................................................88
7.2.2 How the word processor eases the writing process ..............................................94
7.2.3 The word processor and writing quality ...............................................................96
7.2.4 Contextual factors .................................................................................................99

Section 7.3

Computer tasks .................................................................................................................104

Section 7.4

Networked writing .............................................................................................................112
7.4.1 Collaborative practice ............................................................................................112
7.4.1.1 Social cultural theory ....................................................................................112
7.4.1.2 Socio-cultural theory and technology .........................................................113
7.4.2 Tools and environment .........................................................................................115
7.4.3 The roles of teacher and learner in a networked writing context .........................117
CHAPTER 9
Diane Slaouti

Exploring language 241

General aims of the chapter .............................................................. 241
Expected outcomes/objectives ............................................................ 241

Section 9.1

What is a concordancer? ................................................................. 242

Section 9.2

Concorder, corpus, corpora: definitions .......................................... 243

Section 9.3

Data driven learning ........................................................................ 248

Section 9.4

Concordancers and DDL ................................................................. 253

Section 9.5

Corpora in the classroom ............................................................... 255

Section 9.6

Building your own classroom corpus .............................................. 266
9.6.1 Using a concordancer ............................................................. 266

Section 9.7

Learners using concordancers to support writing and error analysis ............................................................... 273
CHAPTER 10

Computers, communication and collaboration: opportunities for integration into local contexts 283

General aims of the chapter ................................................................. 283
Expected outcomes/objectives ............................................................. 283

Section 10.1
Computers and communication ......................................................... 284

Section 10.2
Computer activities for communication purposes ......................... 287
10.2.1 Adventure games ................................................................. 287
10.2.2 Simulations ........................................................................ 289
10.2.3 Authenticity and situated learning ....................................... 294

Section 10.3
Collaboration and learning ............................................................... 298

Section 10.4
Collaboration and talk around the computer .................................... 300

Section 10.5
Computer mediated communication and collaboration ................... 306
10.5.1 Developments in CMC tools ................................................. 306
10.5.2 CMC and collaborative approaches ..................................... 307
10.5.3 Planning activities and sustaining interactions ..................... 309
10.5.4 Talking to computers? The future? .................................... 311

Section 10.6
Integrating technologies: opportunities ......................................... 313
