

BURNETAS APOSTOLOS

Apostolos N. Burnetas is a Professor of Stochastic Operations Research at the Department of Mathematics of the National and Kapodistrian University of Athens. He received his Diploma in Electrical Engineering from the National Technical University of Athens (1986), an MBA (1992), and a Ph.D. in Operations Research (1993) from Rutgers University (USA).

He served as a faculty member at Case Western Reserve University (1994–2003) and as a Visiting Assistant Professor at Rutgers University (1993–1994). Since 2003, he has been with the University of Athens, where he was promoted to Full Professor in 2012. From 2016 to 2020, he served as Chair of the Department of Mathematics and has held several administrative roles and committee positions within the University.

His teaching interests include Operations Research, Probability and Statistics, Stochastic Optimization, Queueing Theory, and Machine Learning. He has taught in undergraduate and graduate programs at the University of Athens, as well as in inter-university and international programs (AUEB, HOU, Hellenic Military Academy, CWRU). He has supervised a large number of Master's theses and doctoral dissertations.

His research interests focus on stochastic optimization, service and supply chain systems, queueing theory, and data-driven decision-making models. His work has been published in leading international journals such as *Management Science*, *Operations Research*, *Mathematics of Operations Research*, *Production and Operations Management*, *European Journal of Operational Research*, and *Queueing Systems*, and has received more than 3,000 citations.

He has served as Associate Editor for international scientific journals (including *Annals of Operations Research* and *Operations Research Letters*) and has been actively involved in the organization of international conferences and scientific activities in the fields of Operations Research and Applied Mathematics.
