ACADEMIC COURSE Co-ORDINATOR

- **2019-2020 Course Coordinator and Tutor of the Course 'Radiological Anatomy'** for the Department of Biomedical Engineering, Faculty of Engineering, University of West Attica. This Course has been offered for the first time in the Department of Biomedical Engineering.

As Course Coordinator I designed the Curriculum of the Course of Radiological Anatomy for the Students of the Department. The Course is structured in four modules including: Module I Radiological Anatomy of Head and Neck; Module II Radiological Anatomy of Thorax-Upper Limb; Module III Radiological Anatomy of Abdomen'; Module IV Radiological Anatomy of Pelvis Lower Limb Each module includes lectures of 2hours and e-learning didactic material. All the lectures are given by myself and I also submit the e-learning didactic material. At the end of the Course students were evaluated by written exams. The Course has been successfully attended by 40 students.

Member of International Committees

2014- Member of the Research Committee of the European Association of Endoscopic Surgery
As a member of the Research Committee I have contributed to the development of Research Agenda for EAES, to the development of the Scientific Program of the Scientific Congresses of EAES, to the Review of Abstracts and Surgical Videos submitted to the International Congress of EAES, to the teaching of young surgeons in research methodology. I have also contributed to the evaluation of Applications of EAES Research Grant Projects.

2018- Member of the Research Talent Subcommittee As a member of the Research Talent Subcommittee I proposed a Distance Learning Diploma for training surgeons in Research Methodology. The Proposal was approved by the Executive Board of EAES and I prepared the Curriculum. However, the project has not proceeded up to now.

2008 Submission of Research Proposal for Funding under the Framework of European Research Council Application for an ERC Synergy Grant with Collaboration with the Laboratory of Pharmaceutical Chemistry of Hellenic National Research Foundation. Suggested Host Institutions: Laboratory of Experimental Surgery Medical School University of Athens and Laboratory of Pharmaceutical Chemistry Hellenic National Research Foundation. Role in the proposal Primary Investigator

RESEARCH ACTIVITY

Undergraduate Research Activity

1990-1994 As an undergraduate student I was trained in the methodology of basic pharmacological research in cellular stress in the experimental model of the unicellular eukaryotic organisms Saccharomyces Cerevisiae ATCC 2366 under the guidance of the Associate Professor Andreas Delitheos and of the Lecturer Ekaterini Tyligada.

1990-1994 I was trained in the methodology of research of adverse drug reactions under the guidance of the Associate Professor John Papadopulos. The results of these research efforts were presented as oral presentations in Panhellenic and European Congresses..

01/01/1992-31/05/1992 Investigator in the Research Program "Control in availability of pharmaceuticals in Greece in combination with countries of European Union" with Principal Investigator Professor of Pharmacology Dionysios Varonos (K.A70/3/569).

POSTGRADUATE RESEARCH ACTIVITY

1997-2002 My research activities were focused in the field of Clinical Pharmacology with special interest in the investigation of the factors that affect patient adherence to the antihypertensive medical therapy as well as in the methods that could lead to the improvement of the adherence. Especially, I investigated the effect of adverse drug reactions as well as of the dosing regimen in adherence. My work led to my PhD Thesis entitled 'Quality of diagnosis and treatment of arterial hypertension in Greece'.

2002-2004 I investigated the role of meta-analysis of randomized clinical trials in the evaluation of adverse drug events and especially of the adverse drug events of the inhibitors of cyclo-oxygenase II. My work led to my Master thesis entitled 'Meta-analysis of Randomized Clinical Trials for the evaluation of safety of coxibs for the Msc Biostatistics Medical School and Department of Mathematics Univesity of Athens, Athens 2004 In addition, my research work led to the publication of guidelines on the methodology of meta-analyses that study adverse drug events.

2003-2005 I investigated the role of salicylates and of the other non steroidal anti-inflammatory agents in the mechanisms of adaptation to cellular stress. In the context of my research work, I developed the methodology of oxidative stress in the unicellular eukaryotic organism S. cerevisiae ATCC 2366 as well as the methodology of measurement of total thiols and of glutathione as biomarkers of the cellular redox state. My work led to the publication of my Master Thesis entitled Systematic review of the effect of oxidative stress in minimally invasive surgery in comparison with conventional surgery. Msc Thesis for the Msc "Minimally invasive surgery, robotic surgery and telesurgery" Athens 2009.

2004 Investigator in the Research Program ”Study of the effect of pharmacologically active substances in Saccharomyces cerevisiae under stress” Laboratory of Pharmacology funded by Medical School of Athens under the scientific responsibility of Assistant Professor Ekaterini Tiligada

2005-2007 Post-doctoral Researcher in the Laboratory of Pharmacology Medical School University of Athens, investigating the role of salicylates in pre-conditioning, as Primary Investigator.

2007-2009 I investigated the role of oxidative stress as well as of the pharmacological modulation of oxidative stress in minimally invasive surgery. My work led to the publication of my Master Thesis entitled ‘Systematic review of the effect of oxidative stress in minimally invasive surgery in comparison with conventional surgery. Msc Thesis for the Msc “Minimally invasive surgery, robotic surgery and telesurgery” Athens 2009 as well as in a number of publications in International Peer Reviewed Journals.

2010 – I work as a Primary Investigator. My research interests are focused in the fields of Minimally Invasive Surgery, Endocrine Surgery, Pharmacology, Senology and include the following:

Minimally Invasive Surgery:

• My research interests include the role of surgical stress in minimally invasive surgery, the effect of robotic assisted surgery in the surgical stress response, the pharmacological modulation of surgical stress response

• I am also interested in the alternative methods of surgical training, i.e virtual reality simulators, mental training

Pharmacology

- drug safety with special interest in analgesics, antimicrobial agents, antiplatelets, anticoagulants, hormones, other endocrine medicines as well as antineoplasmatic agents.
- investigation of possible anticancer effect of old drugs ‘drug repurposing in oncology’’ with special interest in aspirin and the other non steroidal anti-inflammatory agents
- the role of pharmacogenomis in drug safety

Senology

- novel drug design for breast carcinoma
- investigation of possible anticancer effect of aspirin and of the other non steroidal anti-inflammatory agents
- investigation of the possible anticancer effect of green tea catechins
- the role of familial history in the risk of occurrence of breast carcinoma

Endocrine Surgery

- Robotic assisted adrenal Surgery
- Partial Adrenalectomy
- Hereditary and familial endocrine tumors
- Adjuvant treatment of thyroid carcinoma

Novel paedagogical approaches in academic teaching

Current Research projects

1. Primary Investigator Eugenia Yiannakopoulou Project Title The role of web based training in combination with methods of active learning in academic teaching of Midwives students in the First Aid and Management of Emergency Cases **Academic Host** Department of Midwives Faculty of Health Sciences University of West Attica, Athens, Greece

2. **Primary Investigator Eugenia Yiannakopoulou Project Title** Investigation of the role of ultrasound in the as adjunctive method in the training of students in the laboratory of Anatomy **Academic Host** Laboratory of Anatomy, Pathology and Physiology Department of Biomedical Sciences, Faculty of Health Sciences University of West Attica, Athens, Greece

3. **Primary Investigator Eugenia Yiannakopoulou Project Title** Investigation of the role of Web Based Training in Pharmacokinetics Course **Academic Host** Department of Nursing, Faculty of Health Sciences University of West Attica, Athens, Greece

Research Collaborations

- **Laboratory of Pharmacology Medical School of Athens NKUA**
- **1st University Surgical Clinic Medical School of Athens NKUA**
- **Laboratory of Surgical Research Medical School of Athens NKUA** This collaboration led to the submission of a Research Proposal in 2009 as well as in 2011 in the context of European Research Council Starting Grants. Furthermore, a Research Proposal was submitted in 2008 in the context of European Research Council Synergy Grants.
- **Laboratory of Epidemiology Medical School of Athens NKUA**
- **Medical School University of Strassburg France**

These scientific collaborations have led to publications in International Peer Reviewed Journals

- **Laboratory of Pharmaceutical Chemistry National Research Foundation Athens Greece**

This collaboration led to the submission of a Research Proposal in the context of ERC Synergy Grants in 2008.
